

Exyte Hargreaves

Intel - Fab 24 Facility

Life Sciences & Chemicals

A supply only scope including ductwork and ancillaries to be manufactured and delivered to Ireland for installation by others.

From the start of August 2013, Hargreaves has been based in Ireland supporting the design team in terms of site surveys, co-ordination and ductwork constructional advice for finding the best solution to install new systems within existing areas, many of which are very congested with existing services. We are actively participating within the existing INTEL BIM strategy.

Ductwork is manufactured to SMACNA specification.

Installation advice support is also given to the installation contractor to ensure correct standards are maintained.

CASE STUDY

PROJECT DETAILS

Project Name: Intel - Fab 24 Facility

Client: Intel

Contractor: M+W Group

Location: Ireland

Value: £4 million

Date: 2014
